

Lodge Gäddträsk

Welcome to the village Gäddträsk, situated in a really nice part of Lapland. Only 25 km to the small town Lycksele, but still so silent, so beautiful and with great fishing and hunting.

Fishing areas

The village of Gäddträsk (Pikelake in Swedish) is in the centre of a number of lakes and rivers. To produce maximum freedom for the guests we have eight boats placed in four different waters. By this system you can fish in different waters for the whole week. Just 150 m from the lodge you will find two boats at the lake Gäddträsket. The others are placed 10-20 km from the lodge. About 15 km from the lodge you have two small rivers; Örän (grayling) and Granån (trout and grayling). Between August 15- September 14 we also offer guided trips to the salmon fishing in the river Vindelälven.

Fish species

Pike and perch are the main target in this area and within 20 km around the lodge you have two rivers and 10 lakes. The river Umeälven is a dammed river app. 10 km from the lodge and it produces really big pike. The river Örän has a huge nr of pike but not really big, but fantastic surroundings and silence as it's situated in a nature protected area. In the small rivers Örän and Granån You have grayling and trout, and one of the best lakes for big grayling is app. 60 km from the lodge. In autumn we recommend a visit to the wild river of Vindelälven for salmon. This fishing is with guide only, as we use small boats between the rapids, as well as bank fishing.

Fishing season

Pike season is from last week in May to end of September and this is also the season for grayling and trout. The salmon season starts at Aug 15 and lasts to September 14. Your license includes pike/perch fishing in three different license areas in the surroundings.

Fishing methods

Fishing for perch and pike is done mainly with spin casting and most popular is jerk-baits. Also fly fishing is a rewarding method to fish for big pike at the surface.

Fishing regulations

Pike less than 3 kg may be kept for consumption at the lodge. All pike over 3 kg must be released. Perch is also allowed to keep for consumption. One male salmon (river Vindelälvs-80 km from the lodge) per day is allowed to keep.

Fishing guides

Fishing guides (English spoken) are available.

Boats

Our boats are 3,60 Inflatable boats with aluminium floor-perfect to fish from as they have a flat floor and reaches very shallow areas. Electric engines are included and 4 stroke 5 HP engines are optional (SEK 1000/week). Our unique speciality is that we have boats placed in 3-4 different waters. This means that you are free to move between several different waters.

Accommodation

The Gäddträsk lodge is the former village grocery shop (built 1935). The rooms are restored 2011 with much feeling and atmosphere. It has 5 bedrooms, full equipped kitchen and two bathrooms with shower/WC. The house is close to the lake Gäddträsk (appr 150 m). N.B: You have the whole house for Your group only-no other clients in the house when you are here.

Other services

The town Lycksele is only 25 km from Gäddträsk. This small town (9000 citizens) is also known as the capital of Lapland. Lycksele has a zoo with the Nordic fauna, an aqua park, forest museum, shops and restaurant.

Lycksele also has an airport app 20 km from Gäddträsk with daily flights to/from Stockholm.

Location GPS: 64 degrees 24'0"N, 18 degrees 49' 39"E
